

SECURITY STARTS WITH THE RIGHT POLICY

Get the Policy Right First

When it comes to securing data, what works best for one organization may not be the best fit for another. Security policies and procedures for an institution with \$5B in assets and fifty branches will be considerably different from what's optimal for a smaller credit union or community bank. Making the policy choices appropriate for your institution's unique size, complexity, and risk factors is the best way to ensure security while controlling costs.

Cybersecurity policies and procedures guide your processes and plans, and ultimately determine your security posture. Leveraging the right policies naturally leads to smooth implementations and a solid security program. But policies inappropriate for your organization's culture and infrastructure can lead to increased implementation costs and higher risk. That's why it's so important to get it right.

Customized Policies & Procedures

Setting the policy framework for an institution is as much an art as it is a science. Successfully establishing the right policies and procedures requires a comprehensive understanding of

the credit union business combined with a thorough knowledge of cybersecurity best practices and technology.

Redstone Consulting Group® Policy & Procedure services will ensure your organization's cybersecurity framework is current and complete, adapted to best suit your specific needs, and leverages industry best practices. Our services include:

- ❖ Assessing your current policy framework to identify missing, incomplete, and outdated or suboptimal elements. This assessment combines in-depth review of current documentation with remote discovery sessions with key members of your organization.
- ❖ Conducting an impact analysis of the compliance gaps identified during your assessment, resulting in stack-ranked recommendations for policy and procedure updates.
- ❖ Developing cybersecurity policies and procedures specifically tailored to cost-effectively improve your security posture.

“As we’ve come to realize, the idea that security starts and ends with the purchase of a prepackaged firewall is simply misguided.”

– Art Wittmann

Why Redstone Consulting Group?

As a credit union service organization, Redstone Consulting Group focuses on tailoring industry principles and technologies to meet your financial institution’s specific needs. Our experience developing comprehensive cybersecurity policies and procedures enables us to quickly and cost-effectively adapt credit union-specific best practices to your unique needs. We can:

- ❖ **Keep policies aligned with the complexity and risk faced by your institution.** Our team takes the time to understand your organization and customize policy recommendations to match its needs.
- ❖ **Supplement internal expertise with industry best practices.** We work across many financial institutions and are exposed to a wide variety of situations. Put the expertise we’ve developed throughout the years to work for you.
- ❖ **Ensure your organization meets regulatory mandates.** Rest assured your organization is compliant with state and federal regulations.

Community. Innovation. Service.

Redstone Consulting Group is a wholly owned but legally separate subsidiary of Redstone Federal Credit Union®. We serve the credit union community through technologically innovative services and solutions that enable our customers to serve their members better.
