THE REDSTONE CONSULTING GROUP AND LEO CYBER SECURITY PARTNER TO IMPROVE CREDIT UNIONS' READINESS FOR CYBER EXAMS

Starting in 2019, all credit unions of more than \$250M in assets are subject to examination using the NCUA's expanded ACET based cybersecurity exam. Redstone Consulting Group's (RCG) [ACET Collaboration Portal](#) helps credit unions save time and effort when preparing for the exam. The portal organizes tasks, enables role-based collaboration, and provides secure document storage. With the Leo Cybersecurity partnership, The ACET Collaboration Portal is now available to credit unions as part of LEO's comprehensive suite of cybersecurity compliance tools and services. Annual subscription fees are tied to a credit union's asset base start at \$2,000 per year for full functionality and unlimited users.

The ACET Collaboration Portal is a cloud-based platform that consolidates exam preparation in one place, enforces a tailorable workflow, enables role-based access, facilitates outside partner assistance, and electronically stores supporting documents via [Virtual StrongBox™](#). The Portal streamlines exam preparation with an intuitive, project-centered interface, so you know where you stand before the NCUA exam begins. The interface includes integrated progress dashboards for individuals and project owners, with historical tracking of decision process and prior year responses.

"LEO supports our credit union client's preparations for cybersecurity examinations. In the past, coordinating these efforts and consolidating the supporting information has been a significant logistical challenge. Being able to participate fully in the preparation process and share the work in progress remotely and securely will make this much easier for us and our clients" said Charlie Roberts, LEO EVP of Business Development. "By using the ACET Portal we will significantly reduce the costs for meetings, coordination, and travel we incur in assisting client's preparations."

"We're pleased to be working with LEO to support their credit union clients as they take on the complex challenge of preparing for the new NCUA ACET cybersecurity exam," said Steve Powers, President Redstone Consulting Group. "Partners like LEO help us to ensure that the ACET Collaboration Portal is the best tool in the industry for cyber exam preparation."

About Redstone Consulting Group, LLC

The Redstone Consulting Group is a Credit Union Service Organization (CUSO) wholly-owned by Redstone Federal Credit Union. With more than 400,000 members and over \$5 billion in assets, RFCU recognizes that what it solves for itself also benefits other credit unions: "Solve for Redstone, Solve for Many"™. RFCU launched RCG in May 2012. For over seven years, RCG has provided software solutions to financial institutions throughout the country. For more information visit www.redstoneconsultinggroup.org.

About Leo Cyber Security:

LEO is a Cyber-as-a-Service concern who have the deep, practical real-world operational knowledge to architect, build and operate cyber programs for our customers. Our approach to cyber security is a blend of art and science. The best practitioners mix high tech engineering and a restless creative soul. Our solutions leapfrog one size fits all technology solutions. Each problem is unique and demands an individualized customized program.
